

Name : Muhammad Ishraf Shafiq Zainuddin

ID : 200342741

Date : 19th June 2018

Notes

- X - System
 - ~ X Windows System exists as a client - server model

- Server doesn't care what kind of client its connected to
 - ~ You would have a second terminal
- You can connect a remote local terminal to a remote server
- X uses a protocol called X - Input
- X - Events : Input devices
- X System Includes:
 - ~ X - Protocol (sends info from the client to the server)
 - ~ X - Display (handles display on the server side)
 - ~ X - Clients
 - ~ X - Inputs
- Each window is its own client to the server (instance of X - Client).
